608	HINTZEN Peter	Holland	Introduction. What has happened in Iran shows that things can happen very fast. Latin America is a continent in evolution. Latin America is a continent consisting of different regions, each with its own problems. Introduction to each of these regions. Latin A. must find its own answers to its problems. There are more christians in LA than in the whole of Europe. There will be no change in LA without the christians finding an ideology and being reconcilers.

674	HINTZEN Peter	Holland

733	MAUNOIR Mme	France	I went to LA for the first time twenty-five years ago! It is a life commitment. Our vision has been to help our Brazilian friends to take responsibility for their whole continent and that it is not us who go there and who will "do it all". We have learnt to feel at home wherever we have been.	
756	HINTZEN Peter	Holland	In many countries in LA you find nuclei of people who have decided to find God's plan for their countries and continent.	
764	MAUNOIR Monsieur	Switzerland	Future moves in LA; the countries of the Andes. Chili is one of the countries which is most open. How can we bring democracy back to these countries.
